|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SUMMARY | Computer Science graduate (BSc Hons, First Class, NUST) and winner of the Vice Chancellor's Prize, who builds AI tools people use and runs the cloud behind them. I built Procurely, a procure-to-pay agent with human approval checkpoints and a policy knowledge base, and I am building Brightpath, bilingual Shona and English learning games for children who learn differently. A year as ICT Intern at the Institute of Chartered Accountants of Zimbabwe taught me to turn manual processes into automated ones and to keep the systems behind them running. Certified in CompTIA Security+ and as a Google Cloud Associate Cloud Engineer. |

## PROJECTS

### Procurely, AI procure-to-pay agent

2026

Solo build. [github.com/AlbertNjobo/procurely](https://github.com/AlbertNjobo/procurely)

- Built an agent that carries a plain-language purchase request through RFQs and bid analysis to a purchase order.
- Paused the agent for human approval at set checkpoints, and delegated work to specialist sub-agents.
- Enforced purchasing policy through retrieval over embedded policy documents.
- React, TypeScript and Express; deployed with Docker Compose on Alibaba Cloud behind Cloudflare.

### Brightpath, learning games for children who learn differently

2026, in development

Design and build. [brightpath-coral.vercel.app](https://brightpath-coral.vercel.app)

- Bilingual Shona and English maths and reading games, with every question read aloud.
- Wrote Pathfinder, an adaptive engine that tracks mastery per skill, as plain, unit-tested logic.
- Offline first: games are cached on the phone and answers sync when the connection returns.
- Next.js, React and Supabase, packaged for Android.

### BloodChain, blood supply management

2026

NUST final year project

- Stored donor data in Supabase PostgreSQL under row level security, behind an Express API.
- Wrote an audit trail to Hedera Hashgraph, averaging 3.2 second confirmations.

### Sentinel API, server health monitoring

2025

[github.com/AlbertNjobo/sentinel-api](https://github.com/AlbertNjobo/sentinel-api)

- FastAPI service on SQLite that reports CPU, memory, disk and network metrics and raises alerts.
- Deployed on Ubuntu behind an Nginx reverse proxy, with ufw rules and Certbot TLS.

### Also built

- Job Application Skill: an open source Claude Code plugin that tailors CVs, writes cover letters and tracks applications.
- Zimbabwe Grocery Market MCP: an MCP server in Python that compares prices across four retailers.
- LithiTrust: project lead of Task Force 404, a team of six, at the Lithium Value Chain Hackathon 2025.

|                                                    |                             |
|----------------------------------------------------|-----------------------------|
| CompTIA Security+ (SYO-701)                        | Sep 2026, valid to Sep 2029 |
| Microsoft Azure Fundamentals (AZ-900)              | Aug 2026                    |
| Google Cloud Associate Cloud Engineer              | Jul 2026, valid to Jul 2029 |
| ISC2 Certified in Cybersecurity (CC)               | Jun 2026                    |
| AWS Certified AI Practitioner                      | Jun 2026                    |
| Kubernetes and Cloud Native Associate (KCNA)       | May 2026                    |
| Google Cloud Generative AI Leader                  | Oct 2025, valid to Oct 2028 |
| GCI World, Data Science, The University of Tokyo   | Aug 2026                    |
| Claude with the Anthropic API, Anthropic Education | Course                      |

## SKILLS

|                                 |                                                                                                             |
|---------------------------------|-------------------------------------------------------------------------------------------------------------|
| <b>AI and agents</b>            | Claude and Claude Code, MCP servers, multi-agent delegation, human-in-the-loop approval, RAG, Vercel AI SDK |
| <b>Languages and frameworks</b> | Python, TypeScript, JavaScript, SQL, Bash, PowerShell, React, Next.js, Express, FastAPI                     |
| <b>Cloud and infrastructure</b> | Google Cloud, Azure, AWS, Docker, Kubernetes, Terraform, Linux, Nginx, Proxmox VE                           |
| <b>Security and Microsoft</b>   | Microsoft 365, Entra ID, Active Directory, Conditional Access, Intune, Power Platform, Sophos firewall      |
| <b>Data</b>                     | Supabase (PostgreSQL, row level security, pgvector), Microsoft SQL Server, SQLite, Firebase, GA4            |

## LEADERSHIP

- Regional Leader, Microsoft Global Community Initiative 2026: one of 118 chosen from 300+ applicants.
- Regional Finalist, Huawei ICT Competition 2025 to 2026, Cloud Track.
